WORK EXPERIENCE

11 May 2016–Present

Frontend Web Developer

D.Labs d.o.o., Ljubljana (Slovenia)

At D.Labs I've worked on a number of projects for our biggest client - Business of Fashion. These projects included BoF Education, an online course platform, BoF Professional, a content subscription platform, hybrid mobile app for iOS, and BoF Community. During this time I've used various programming languages like JavaScript, TypeScript, HTML, (S)CSS, Twig, and technologies like AngularJS, Angular (2, 4, 5, and 6), Ionic 2, Angular Material, Twitter Bootstrap (3 and 4), gulp, webpack, git, npm, docker, REST, GraphQL + Apollo, and many others.

11 Nov 2014–30 Jun 2017

Creator and Developer

Empire24, Lendava (Slovenia)

<http://empire24.co>

I created the brand Empire24, its website and its first product Linkr. Development included creating a complex mix of back-end APIs using .NET WebApi 2 and front-end based on HTML5, CSS3 (SASS), JavaScript, AngularJS 1.x and Material Angular. Implementation was done in Visual Studio 2013 and 2015. It also involved usage of tools such as NPM, Gulp, Bower, and Git.

25 Jan 2012–10 Nov 2014

Microsoft Dynamics NAV Developer

Adacta d.o.o., Ljubljana (Slovenia)

I worked as a Microsoft Dynamics NAV developer.

Most of my time at Adacta, I worked as a part of a team on a single project for a big client. The project was being implemented in NAV 2009. My responsibilities ranged from on-going tasks that included creating or altering reports to implementing and seeing through migration of data from client's old system to NAV 2009.

I was also a part of Adacta's support team for existing clients. I helped them when there were problems with existing implementations of NAV, implemented new features and migrated to newer NAV versions.

At my position I also learned a lot about how ERPs function in real-life environments.

1 Apr 2009–12 Dec 2010

Web Developer

Plenum, Kopač & Modic d.n.o., Ljubljana (Slovenia)

My main task was taking a design created in Photoshop and making it into a working, dynamic web site in accordance with what the specific client desired. The websites were developed using (X)HTML, CSS and jQuery. The underlying logic was based on top of an in-house CMS written in PHP and MySQL.

My other tasks included repair and maintenance of previously built web sites, such as on-site SEO optimization and further development of the in-house CMS.

15 Jun 2010–5 Nov 2010

Joomla Web Developer

Faculty of Natural Sciences and Mathematics, Maribor (Slovenia)

I was contracted by the Faculty of Natural Sciences and Mathematics in Maribor to develop an abstract submission system for the European Conference on Liquid Crystals 2011. They had already set up a Joomla-based website, so I developed a 2-part plugin. The main part was completed by June 2010, but by request I implemented some additional features.

14 Aug 2004–12 Jan 2007

C#/ .NET Developer

Agito d.o.o., Ljubljana (Slovenia)

I was a C# developer using .Net framework 2.0 and Visual Studio 2003 and 2005. I worked in a team environment on business Windows and ASP.NET Web Applications. These applications were usually custom information systems for specific customers. All of these applications used SQL Server databases.

1 Sep 2002–20 May 2005

Web Developer

Gimnazija Franca Miklošiča Ljutomer, Ljutomer (Slovenia)

As part of the school's computer lab team I co-developed and then helped maintain the school website.
